

Yes, you can...

get better broadband now!

South Norfolk Council and our partner InTouch Systems (www.itswisp.co.uk) have been working together to make fast wireless broadband available to everyone in South Norfolk.

With a network of 33 church towers and masts transmitting wireless broadband we've got our region covered so it's easy for you to go online with confidence.

We seem to rely on the internet for just about everything these days. No-one likes super slow broadband and now you don't have to put up with it.

Our wireless broadband offers speeds of 10-30 Mbps and it's easy to get. InTouch Systems

will survey your home (to confirm the speed you'll get) and when you're happy will send someone to fit a (tea saucer sized) dish alongside your TV aerial. With a free router, you're then good to go!

InTouch Systems' hassle-free service gives you download speeds to get you streaming and gaming, generous data allowances (more than you need we think) and a robust network built with the latest technology. This is what customers who use InTouch Systems say:

- Mr C (Beccles) "Wow - you guys operate an efficient system; very impressed!"
- Mr E (Wramplingham) "very good" service and an installation that was "excellent, the engineer was very helpful".
- Mr B (Gissing) and Mr S (Hethel) rated the service as excellent all round.
- Mrs J (Diss) "The installer was great - he made a real effort to get a good signal and was considerate and careful".

Interested? Register with InTouch Systems at enquiries@itswisp.co.uk or 01603 425209.

**Wireless broadband –
wherever you are**
